Repairs to continue on Town Bluff Dam at B.A. Steinhagen Lake

Fort Worth, TX - Officials from the Fort Worth District, U.S. Army Corps of Engineers, said today that maintenance repairs on Town Bluff Dam (Dam B) at B.A. Steinhagen Lake are expected to be complete by the end of February 2002, or sooner if weather permits.

The repair work at the structure coincides with the scheduled drawdown of the lake to help control aquatic vegetation. Lake levels are being maintained at about elevation 76.5 feet but should return to the conservation (or normal) level of 82.5 feet by March 2002, in time for the beginning of the recreation season.
